

Andrei Simonov

Websites and apps that work for your business

I'm Andrei Simonov, a developer. I build **websites of any level, mobile apps for Android and iOS, and bots.** I write the code from scratch and name the price before I start. It doesn't change.

Message on Telegram

Message on WhatsApp

Reply within an hour, Mon-Sat

Hand-written code, no website builders

1-month warranty

What I can build for you

From a simple page about your business to an online store, a mobile app and a bot that takes requests for you.

Websites

One-page and multi-page sites, sales pages, online stores and services with user accounts.

Landing page

Business card site

Sales website

Company website

Online store

Web service

6 packages: €120–€750

[See packages](#)

Mobile apps

For Android, iOS or both at once. I'll help you publish on Google Play and the App Store.

€650–€1,300

[Details](#)

Bots

Telegram, WhatsApp, VK and website chat. They answer customers and take requests while you're busy.

€25–€180

Details

SEO

I'll set up your site so people can find it on Google.

What it is

Security and databases

I protect your site from hacking and spam and store your customers' data safely.

What's included

Desktop software

Apps for Windows and macOS built around your task.

Price on request

Why I write code from scratch instead of using a website builder

Builders like Tilda or Wix look easier, but you pay for that convenience for as long as the site exists. A hand-coded site is faster, more reliable and fully yours.

Website builder

- ⊗ A monthly subscription for as long as the site is online
- ⊗ A template that looks like thousands of other sites
- ⊗ The feature you need may simply not exist
- ⊗ Lots of extra code: pages load slower, and Google notices
- ⊗ The site is tied to the platform, so leaving with it is hard

Hand-coded website

- ✓ You pay for the work once, and a simple site can even be hosted for free
- ✓ A design made for your business
- ✓ Any feature: bots, payments, user accounts, integrations
- ✓ Only the code you need: fast loading and better search rankings
- ✓ The code, domain and access are yours. Move it anywhere

Websites: packages and prices

The packages from Start to Store build on each other: each one includes everything from the previous one. Service is a separate option for projects with user accounts. Prices are fixed, and you only pay for my work.

Start

One-page website

Time: **from 3 days**

What you get

- ✓ A design made for your business, not a template
- ✓ Up to 6 sections: about, services, prices, photos, contacts
- ✓ Works well on phones, tablets and computers
- ✓ "Message on Telegram / WhatsApp" and call buttons
- ✓ Basic SEO and a secure HTTPS connection
- ✓ Launch online

What it does for you

A neat page you can proudly send to clients or add to your social media profile.

Business card

€190

Website up to 5 pages

Time: from 5 days

What you get

Everything in Start, plus:

- ✓ Up to 5 separate pages: home, services, prices, about, contacts
- ✓ A request form: requests arrive in your Telegram instantly
- ✓ Analytics: see how many people visited and where they came from
- ✓ A map with your address

What it does for you

A complete business website: clients find everything themselves and leave a request, even when you're busy.

My pick if you're running ads

Sales

€290

Sales website

Time: from 7 days

What you get

Everything in Business card, plus:

- ✓ A structure that leads visitors to a request: benefits, trust, answers to doubts
- ✓ A Telegram bot that replies to the client right away and forwards the request to you
- ✓ Goal tracking: see which ads bring in requests
- ✓ Advanced SEO
- ✓ Animations and interactive elements

What it does for you

The site turns visitors into requests, and you see which ads pay off.

Company

Corporate website

○ €450

Time: **from 12 days**

What you get

Everything in Sales, plus:

- ✓ Up to 10 pages
- ✓ Admin panel: change texts, prices and photos yourself, no developer needed
- ✓ CRM or Google Sheets connection: requests are saved automatically
- ✓ A blog or news section that helps SEO

What it does for you

The site grows with your business, and you manage it yourself.

Store

Online store

○ €650

Time: **from 15 days**

What you get

Everything in Company, plus:

- ✓ A catalog with categories, filters and search
- ✓ Cart and checkout
- ✓ Online card payments
- ✓ Order notifications in Telegram
- ✓ Manage products and orders in the admin panel

What it does for you

Sales around the clock: clients choose and pay on their own, and you get a ready order.

Service

Website with user accounts

Time: **from 20 days**

What you get

- ✓ Sign-up and login for your clients
- ✓ Personal account: bookings, orders, history, documents
- ✓ A database built for your task
- ✓ Roles: client, staff, administrator
- ✓ Online booking or reservations
- ✓ User data protection

What it does for you

Your own online service: clients use it on their own, and you see everything in one place.

In every package

Unique design, works well on phones, basic SEO, HTTPS, launch online, 3 rounds of revisions and a 1-month warranty.

Mobile apps

I build apps for Android and iPhone: cross-platform (one app for both systems) and native (a separate app for each). I help publish them on Google Play and the App Store.

One platform

Android or iOS

€650

Time: **from 3 weeks**

What you get

- ✓ Screen design in your brand style
- ✓ Up to 8 screens
- ✓ Sign-up and login
- ✓ Push notifications
- ✓ Server and database
- ✓ Testing on real phones

What it does for you

Your business on your client's phone, one tap away. A good start if most clients use one system.

Best value for reach

Android + iOS

Cross-platform

○ €900

Time: from 4 weeks

What you get

Everything in One platform, plus:

- ✓ One app that runs on both Android and iPhone
- ✓ The same look and features on both systems
- ✓ Updates ship to everyone at once

What it does for you

An app for all your clients, cheaper and faster than two separate ones.

Native

Separate Android and iOS apps

○ **€1,300**

Time: **from 6 weeks**

What you get

Everything in One platform, plus:

- ✓ Two separate apps, each written specifically for its system
- ✓ Full access to phone features: camera, location, sensors
- ✓ Offline mode if needed

What it does for you

Maximum speed and smoothness. Right for you if the app is your main product.

Publishing on Google Play and the App Store

I'll prepare the description and screenshots, upload the app and get it through store review.

○ **€60**

Bots

A bot is a program in a messenger that answers clients and takes requests for you. Around the clock, with no days off.

Website requests to Telegram

Every request from your website form arrives in your Telegram instantly.

What it does for you

No request gets lost in your inbox.

Telegram bot: Basic

A menu, answers to common questions, request intake.

What it does for you

Clients get an answer right away, even at night.

Telegram bot: Advanced

○ **€180**

Online booking or orders, payment inside the bot, a client database, broadcasts and an owner panel.

What it does for you

The bot works like an administrator who never gets tired or makes mistakes.

WhatsApp or VK bot

○ **€150**

Answers and takes requests where your clients already message you.

What it does for you

No need to move clients to another messenger.

Website chatbot

A chat window on your website that answers questions and collects visitors' contacts.

What it does for you

Visitors get answers and don't leave for a competitor.

Extra services

Add them to any package or order them separately, including for a website you already have.

Extra page €30

One more page for any website.

Admin panel €120

Change texts, prices and photos yourself, no developer needed.

Online payments €90

Clients pay by card right on your website.

Integration €70

CRM, Google Sheets or email marketing: requests and orders land where you already work.

Visitor analytics €25

Google Analytics: how many people came and where from.

Advanced SEO €80

Finding the searches people use to look for your services, and tuning pages for them.

Database €120

Reliable storage for clients, orders and bookings: I design and connect it.

Security check €90

I find weak spots on your website and fix them.

Speed-up €70

A slow website starts loading fast.

Turnkey launch €30

Domain, hosting, email on your domain and all the setup.

Changes to your website €15 / hour

I'll fix or improve your site, even if I didn't build it.

Support after launch €35 / month

Up to 2 hours of changes a month, updates, backups and monitoring.

Windows or macOS app on request

A desktop app built around your task.

SEO: how clients will find your website

SEO means setting up your website for search engines. When someone searches Google for “phone repair near me”, they see ten sites on the first page and almost never scroll further.

The goal of SEO is to get your site into that top ten, so clients come on their own without paid ads.

Basic SEO

in every website

- ✔ Correct page titles and descriptions
- ✔ A sitemap for search engines
- ✔ Fast loading
- ✔ A good-looking preview when your link is shared in a messenger
- ✔ Google Search Console setup

Advanced SEO

€80

- ✓ Finding the searches people use for your services
- ✓ Texts and pages tuned to those searches
- ✓ Markup so prices and ratings show right in search results
- ✓ Setup for map search and “near me” searches

To be honest: SEO doesn't work overnight. Search engines need time, usually a few weeks.

🔍 phone repair near me

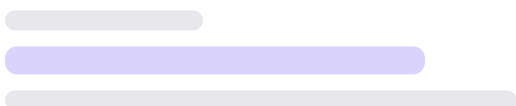

Search results

That's you

your-site.com

Phone repair in 1 hour, 6-month warranty

Screen and battery replacement while you wait. Book online, ★ 4.9

Security comes with every project

You don't need to know anything about hacking or encryption. I build protection in from the start, at no extra cost.

Secure HTTPS connection

Data is encrypted, and the browser shows a padlock.

Spam protection

Your forms don't fill up with junk requests from bots.

Hacking protection

I close the most common ways websites get hacked.

Safe passwords

Passwords are only stored encrypted.

Backups

If something happens, we restore everything.

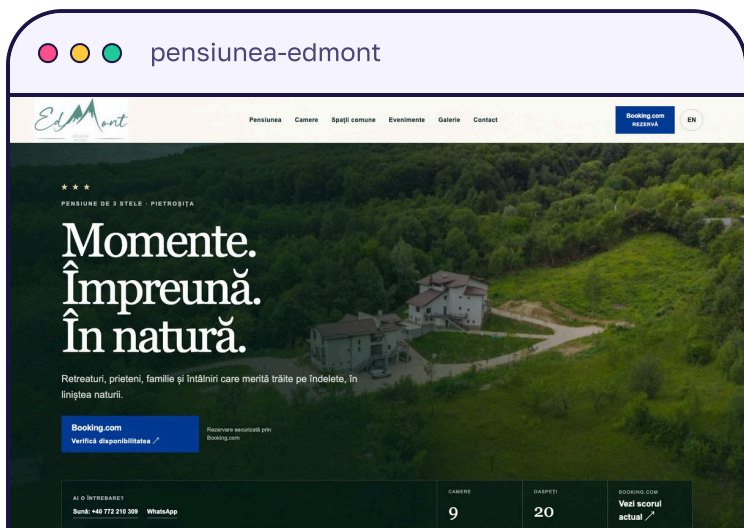

Access rights

Each user only sees their own data.

Projects

A few projects you can open and try right now.

One-page website

EdMont guesthouse

A website for a guesthouse in Romania: rooms, shared spaces, events, a gallery, booking through Booking.com and WhatsApp contact. Two language versions.

Landing page

Job for You

A website for a household staffing service in Europe: separate paths for employers and candidates, request forms, contact via WhatsApp and Telegram.

Open the website

About me

I'm Andrei. I build websites and apps for small businesses, bloggers, startups and companies. I work remotely with clients from any country, and we discuss everything on Telegram or WhatsApp.

I want you to know exactly what you're paying for. That's why my prices are public and every package is broken down point by point.

Studying Informatics at IMC
University of Applied Sciences
Krems, Austria

Why working with me is easy

- ✓ I reply within an hour, Monday to Saturday
- ✓ I write code from scratch, with no templates or builders
- ✓ Every project works well on phones
- ✓ Modern design that sets you apart from competitors
- ✓ We agree on the scope, timeline and price in writing before I start
- ✓ Fast: a one-page site from 3 days
- ✓ I design it myself or work from your ready-made mockup

How we'll work together

1

Getting to know you

You tell me about your task on Telegram or WhatsApp. The consultation and estimate are free.

2

Plan and price

I write down what I'll build, by when and for how much.

3

50% prepayment

And I start working. Large projects are paid in stages.

4

Design and development

I show you progress along the way, and you request changes.

5

Handover and launch

You check the finished project and pay the remaining 50%. I launch it and hand over all access.

6

Warranty

For a month after launch, I fix any bugs for free.

Terms

Payment

50% before I start and 50% on handover.
Projects from €500 are paid in stages: you pay for each finished stage.

3 rounds of revisions

One round means you collect all your comments in one list and I apply them in one go. Revisions stay within the agreed scope; new features are priced separately.

1-month warranty

If anything I built doesn't work correctly, I'll fix it for free. The warranty covers bugs, not new features or changes.

10% bundle discount

Order two services from different sections, like a website and an app, or a website and a separate bot, and get 10% off everything.

Free consultation

We'll discuss your task, I'll suggest the best solution and name the exact price. No obligation.

No surprises

The price is fixed before I start and doesn't change. You only pay for my work.

Paid separately

You pay these services directly, not me. I'll help you set everything up.

Domain (website address)
usually €10–20 a year

Hosting
simple site free, with a database from €5 a month

Google Play account
\$25 once

App Store account
\$99 a year

WhatsApp Business API

Meta's rates

Online payments

payment provider fees

In plain words

A short glossary so everything above makes sense.

Landing page

A website made of one long page about one product or service.

Business card site

A small website with a few pages about you and your services.

Responsive website

A site that adapts to phone, tablet and computer screens on its own.

Domain

Your website's address, like yourname.com. Paid once a year.

Hosting

The place on the internet where your website lives and loads from.

HTTPS

A secure connection. The browser shows a padlock next to the address.

SEO

Setting up a website so people can find it on Google.

Admin panel

A private part of the site where you change texts, prices and photos yourself.

Database

Reliable storage for information: clients, orders, bookings.

CRM

Software for keeping track of clients and deals.

Analytics

Website statistics: how many people visited, where from and what they did.

Bot

A program in a messenger that answers and takes requests for you.

Cross-platform app

One app that runs on both Android and iPhone.

Native app

An app written separately for each system.

Push notifications

Messages from an app that pop up on the phone screen.

Round of revisions

All your comments in one list, which I apply in one go.

Questions people ask

My task doesn't fit any package. What now?

Tell me what you need. I'll estimate the project for free and name the exact price before we start.

Can I edit the website myself later?

Yes. An admin panel comes with the Company and Store packages, and you can add one to any other site for €120.

What do you need from me?

Texts, photos, your logo (if you have one) and answers to my questions about your business. If you don't have texts, I'll help you plan the structure and suggest what to write.

Who will own the website?

You. After payment, I hand over the code, the domain and all access.

I already have a design. Can you build from it?

Yes. I usually design myself, but I'm happy to build from your ready-made mockup, for example in Figma.

Do you only work in one country?

No, I work remotely with clients from any country. We talk on Telegram or WhatsApp.

What if I don't like the result?

I show progress at every stage, and every project includes 3 rounds of revisions. You see how it's going long before handover.

How long will it take?

Each package lists an approximate timeline. We agree on the exact deadline in writing before I start.

Tell me about your task

I'll reply within an hour (Mon–Sat),
estimate your project for free and
suggest the best place to start.
